

2019 International Symposium on Clean Energy and Advanced Materials (CEAM2019)

25th-28th September 2019, Pusan National University, Busan, South Korea.

The 2019 international symposium on clean energy and advanced materials (CEAM2019) is sponsored by the International Collaborative Center for Carbon Future at Pusan National University during 25th-28th September, 2019. This symposium will be held secondly in South Korea after 1st CEAM symposium was held in Australia last year. This symposium provides a platform for researchers, engineers, academicians as well as industrial professionals from universities and industries to exchange ideas, share information and establish R&D network to promote collaboration and technology transfer. We are looking forward to meeting you in Busan at CEAM2019.

Symposium topics:

- Coal and biomass pyrolysis, gasification and combustion
- Coal and biomass to fine chemicals
- Carbon capture and utilization
- Hybridization technology for coal power generation
- Metallurgical coke production
- Advanced carbon materials from coal and biomass
- Low carbon economy sustainability
- Energy storage technology
- Gas treatment and smog control

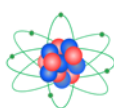

Publication:

Selected papers will be published in a special issue of *Energy and Fuels* in 2019. The authors will submit their full papers directly to the special issue of *Energy and Fuels* shortly after the symposium. The special issue will be managed by the guest editor through the ACS editorial system.

Registration:

The registration fee for this symposium is 450,000 Korean Won per head for normal registration, and 300,000 Korean Won per head for students.

The symposium can only accept credit card and the receipt (invoice) will be provided at registration.
